Visa Status: Visit Visa | **Languages:** English, Hindi, Malayalam

PROFESSIONAL SUMMARY

Data Science graduate (B.Tech CSE) who builds end-to-end AI analytics platforms, ML pipelines, and Power BI dashboards on datasets of 1M+ records. Delivered a demand forecasting model with 94.9% R^2 and an on-device LLM compression method that cut model size by 70.8%. Three data internships; proficient in Python, SQL, Power BI, and Scikit-learn. Seeking Data Science, Machine Learning, and AI Engineering roles in the UAE.

EDUCATION

B.Tech in Computer Science and Engineering (Data Science) 2022 – 2026

SCMS School of Engineering and Technology CGPA: 7.08

Higher Secondary Education 2020 – 2022

Sree Gokulam Public School XII: 64% | X: 74%

TECHNICAL SKILLS

Programming	Python, SQL, C++, Django, FastAPI
Data Analytics	Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis, Feature Engineering
Machine Learning	Scikit-learn, XGBoost, Random Forest, Regression, Classification, Forecasting, SHAP
Generative AI	Gemini API Integration, LLM Quantization, On-Device LLM Inference (Flutter, JNI, C++)
Visualization	Power BI, Tableau, Plotly, Matplotlib, Seaborn
Tools	Git, GitHub, Streamlit, VS Code, Jupyter Notebook, Excel

PROJECTS

AIBUS – AI-powered Business Utility Suite

Python, Streamlit, Pandas, Plotly, Scikit-learn, Prophet, Gemini API

- Built an AI-powered business intelligence platform that combines forecasting, anomaly detection, customer segmentation, Gemini API-generated insights, and interactive dashboards.
- Engineered a modular analytics pipeline handling 1M+ records with automated preprocessing, schema detection, feature engineering, and exportable PDF reports.

DemandIQ

Python, Streamlit, Pandas, Plotly, Scikit-learn, XGBoost, Random Forest, Gemini API

- Developed a production-style demand forecasting platform on 1M+ retail records, achieving 94.9% R^2 with Random Forest.
- Engineered an end-to-end ML pipeline covering automated preprocessing, feature engineering, model selection, forecasting, Gemini API insights, and interactive KPI dashboards.

ANDRO-LLM

Flutter, C++, Python

- Developed EMWQ-R, a custom quantization technique that reduces the LLaMA 3.2 3B model size by 70.8% with less than 6% quality degradation.
- Built a 5-layer on-device Android inference architecture using Flutter, JNI, and optimized C++, delivering 4.2 tokens/sec on Snapdragon 695 devices.

INTERNSHIPS

Data Analyst Intern, Elevate Labs Aug 2025 – Sep 2025

- Designed Power BI dashboards and analyzed business datasets using Python, SQL, and Pandas for business reporting.

Data Analyst Intern, Paleri Business Info Solutions LLP Feb 2025 – Mar 2025

- Cleaned, transformed, and visualized datasets using Python, Excel, SQL, and Power BI for business reporting.

Data Science Intern, Academor Apr 2023 – May 2023

- Performed EDA, preprocessing, and feature engineering, and built machine learning models using Scikit-learn.

CERTIFICATIONS

- Python for Data Science – Infosys Springboard
- Data Analysis with Pandas and Python – Infosys Springboard
- Databases and SQL for Data Science with Python – Coursera
- Foundations of Project Management – Coursera
