Professional Summary

B.Tech graduate in Computer Science with a specialization in Data Science. Skilled in Python, SQL, Power BI, and machine learning, with practical experience in data analysis and visualization through internships and academic projects. Seeking an opportunity to contribute and grow as a Data Analyst or Data Scientist.

Experience

Data Analyst Intern, Elevate Labs

Aug 2025 - Sep 2025

- Built Power BI dashboards to visualize key business metrics and trends.
- Cleaned and analyzed datasets using SQL and Python (Pandas).

Data Analyst Intern, Paleri Business Info Solutions LLP

Feb 2025 - Mar 2025

- Processed and transformed datasets using Python (Pandas) and Excel.
- Developed Power BI dashboards to support business reporting.

Data Science Intern, Academor

Apr 2023 - May 2023

- Performed data cleaning, exploratory data analysis, and visualization.
- Assisted in developing machine learning models using scikit-learn.

Projects

AI-Powered Business Intelligence Platform

Python, Streamlit, Pandas, Plotly, Scikit-learn, Prophet, Gemini API

- Developed an AI-powered Business Intelligence platform with interactive dashboards for sales, customer, and operational analytics.
- Built an automated data pipeline to upload, clean, validate, and process business datasets using schema detection and feature engineering.
- Integrated AI-powered insights, sales forecasting, customer segmentation, anomaly detection, and exportable reports in PDF, Excel, and CSV formats.
- Designed a modular and reusable architecture to support multiple retail and sales datasets with minimal manual configuration.

DemandIQ

Python, Streamlit, Pandas, Plotly, Scikit-learn, Prophet, Gemini API

- Developed an AI-powered business intelligence platform for retail data analysis with interactive dashboards and automated reporting.
- Implemented data preprocessing, demand forecasting, inventory analysis, customer segmentation, and anomaly detection using machine learning.
- Integrated AI-generated business insights and enabled export of executive reports in PDF, Excel, and CSV formats through a modular architecture.

ANDRO-LLM

Flutter, C++, Python

- Developed an Android application for on-device inference of a quantized LLaMA model without cloud dependency.

- Optimized memory usage and inference speed using EMWQ quantization and llama.cpp.
- Integrated a Flutter interface with a native C++ backend using FFI for efficient inference.

Ecowatt – Electricity Consumption Estimator

Python, Tkinter

- Developed a desktop application to estimate household electricity consumption and cost.
- Designed an intuitive graphical interface with real-time usage calculations.

Education

B.Tech in Computer Science and Engineering (Data Science)

2022 - 2026

SCMS School of Engineering and Technology, Karukutty, Ernakulam | **CGPA: 7.08**

Higher Secondary Education

Sree Gokulam Public School, Guruvayoor | Class X: 74% | Class XII: 64%

Certifications

- Python for Data Science - Infosys Springboard
- Data Analysis with Pandas and Python - Infosys Springboard
- Python: From Zero to Hero - Udemy

Technical Skills

Programming & Querying: Python, SQL

Data Science & Analysis: Machine Learning, Data Cleaning & EDA, Statistical Analysis, Feature Engineering & Model Evaluation

Data Visualization: Power BI, Matplotlib, Seaborn
